Over a period of time I felt my bite was changed and I developed jaw pain. Dr Sheldon fitted a NTI to be placed in my mouth at night. At that time it did not seem to me a small piece of plastic worn only at night could have much effect. Over the next three months very significant changes occurred in my mouth and the pain completely stopped. Chewing food is easier with what seems to be the bite I had some years ago. The best news is no more pain.
